

# Washing Line of Time

Ages	Subject	Topics	Resources
3-5 years 5-7 years	Science Art & Design History	Time Fossils	Colouring pens, piece of string, pegs, scissors, tape, glue, picture of yourself & older family member, pictures & frame templates from Lottie's activity pack

Lottie isn't really sure what is older, her grandparents or the fossils she has found! Can you help her put all the pictures in the correct time order so she can create a washing line of time? This activity can help us understand that the Earth we live on and the fossils we find are actually hundreds of millions of years old. It will make you look at your grandparents in a new way!
